

“The tablet especially designed for seniors”

Amigo

Bridging the generation gap

Amigo

Especially designed for seniors, the Amigo tablet allows to stay in touch with family, friends and relatives. Video calls, picture sharing, diary, appointments, e-mails, internet, games, etc.: the Amigo tablet has much to offer, in a totally safe and easy environment.

Designed to be extremely easy to use, the Amigo tablet does not require prior computer knowledge. It takes only a few minutes to learn how to enjoy its many functions. And, it's fun to use!

Amigo. Bridging the generation gap

Hello!

A simple announcement shows up on the Amigo screen, complemented by a notification sound. You decide at what time this message is displayed. And should it not be acknowledged by the senior within a certain amount of time, defined by you, the tablet will send a warning message via e-mail or SMS to persons of your choice.

Convenient reminders

How to avoid forgetting to take the right medication on time or not exercising a bit? Don't worry, the Amigo will send suitable reminders to the senior and give precious hints and tips to the people helping him or her in his or her everyday life. On the AmigoClub Portal, you will be able to set up these notifications in a quick and easy way.

News and weather

The “News” function of the Amigo Tablet allows to stay in touch with what’s going on in the world but also near home. The weather forecast will advise how to dress to go out and if either an umbrella or sunglasses are needed!

A day spent with the Amigo is a day full of joy!

Games

On one's own or with friends or grandchildren, playing games installed on the Amigo will offer great moments of joy and entertainment. They will help exercise memory and sharpen attention skills while playing and having fun.

Easy Diary

From medical appointments to birthday parties or dinners with children and grandchildren: they will all show up on the Amigo diary, as specified on the AmigoClub Portal.

Video chat

We never see enough of those we care about. So why not connect by making a video call? Everything is just easier when we can see each other, from next door or from far, far away!

Photos and videos

The Amigo allows viewing photos and videos, share one's most precious moments with family and friends. Transferred to the tablet from the AmigoClub Portal, last year's vacation photos or videos of a child's first steps are the best gifts one can possibly offer to a senior citizen.

Staying in touch, wherever you are

The AmigoClub Portal is a personal and secure environment where authorised family members, close friends and relatives are allowed to communicate with the Amigo user. Many functionalities of the Amigo tablet can easily be configured through the Portal, to adjust settings to the preferences of the senior. It also helps relatives to better organise and follow healthcare requirements of elderly persons.

“What a reassuring feeling!”

“Thanks to the Amigo, we all share the enjoyable moments in our lives with my mother! She always loves the photos we send her. We also frequently have video calls and it is comforting to see that she is well and in good shape. The Amigo brings us closer together, and in doing so, my mother never really feels left on her own. We are also reassured as we can check her well-being.

I now realise how wonderful this tablet has been as a gift. It helps my Mum reinforce her sense of autonomy, an important factor in helping her keep on living in her home, as she always wanted to.”

Linda S., Nyon

Order your Amigo today and join the AmigoClub!

Amigo Tablet

295 CHF (One-time payment)
